interiot

INTEROPERABILITY OF HETEREOGENEUS
IOT PLATFORMS.

SMART GRID PLATOFORMS   E-HEALTH PLATOFORMS   SMART FACTORIES PLATOFORMS   TRANSPORT LOGISTIC PLATOFORMS
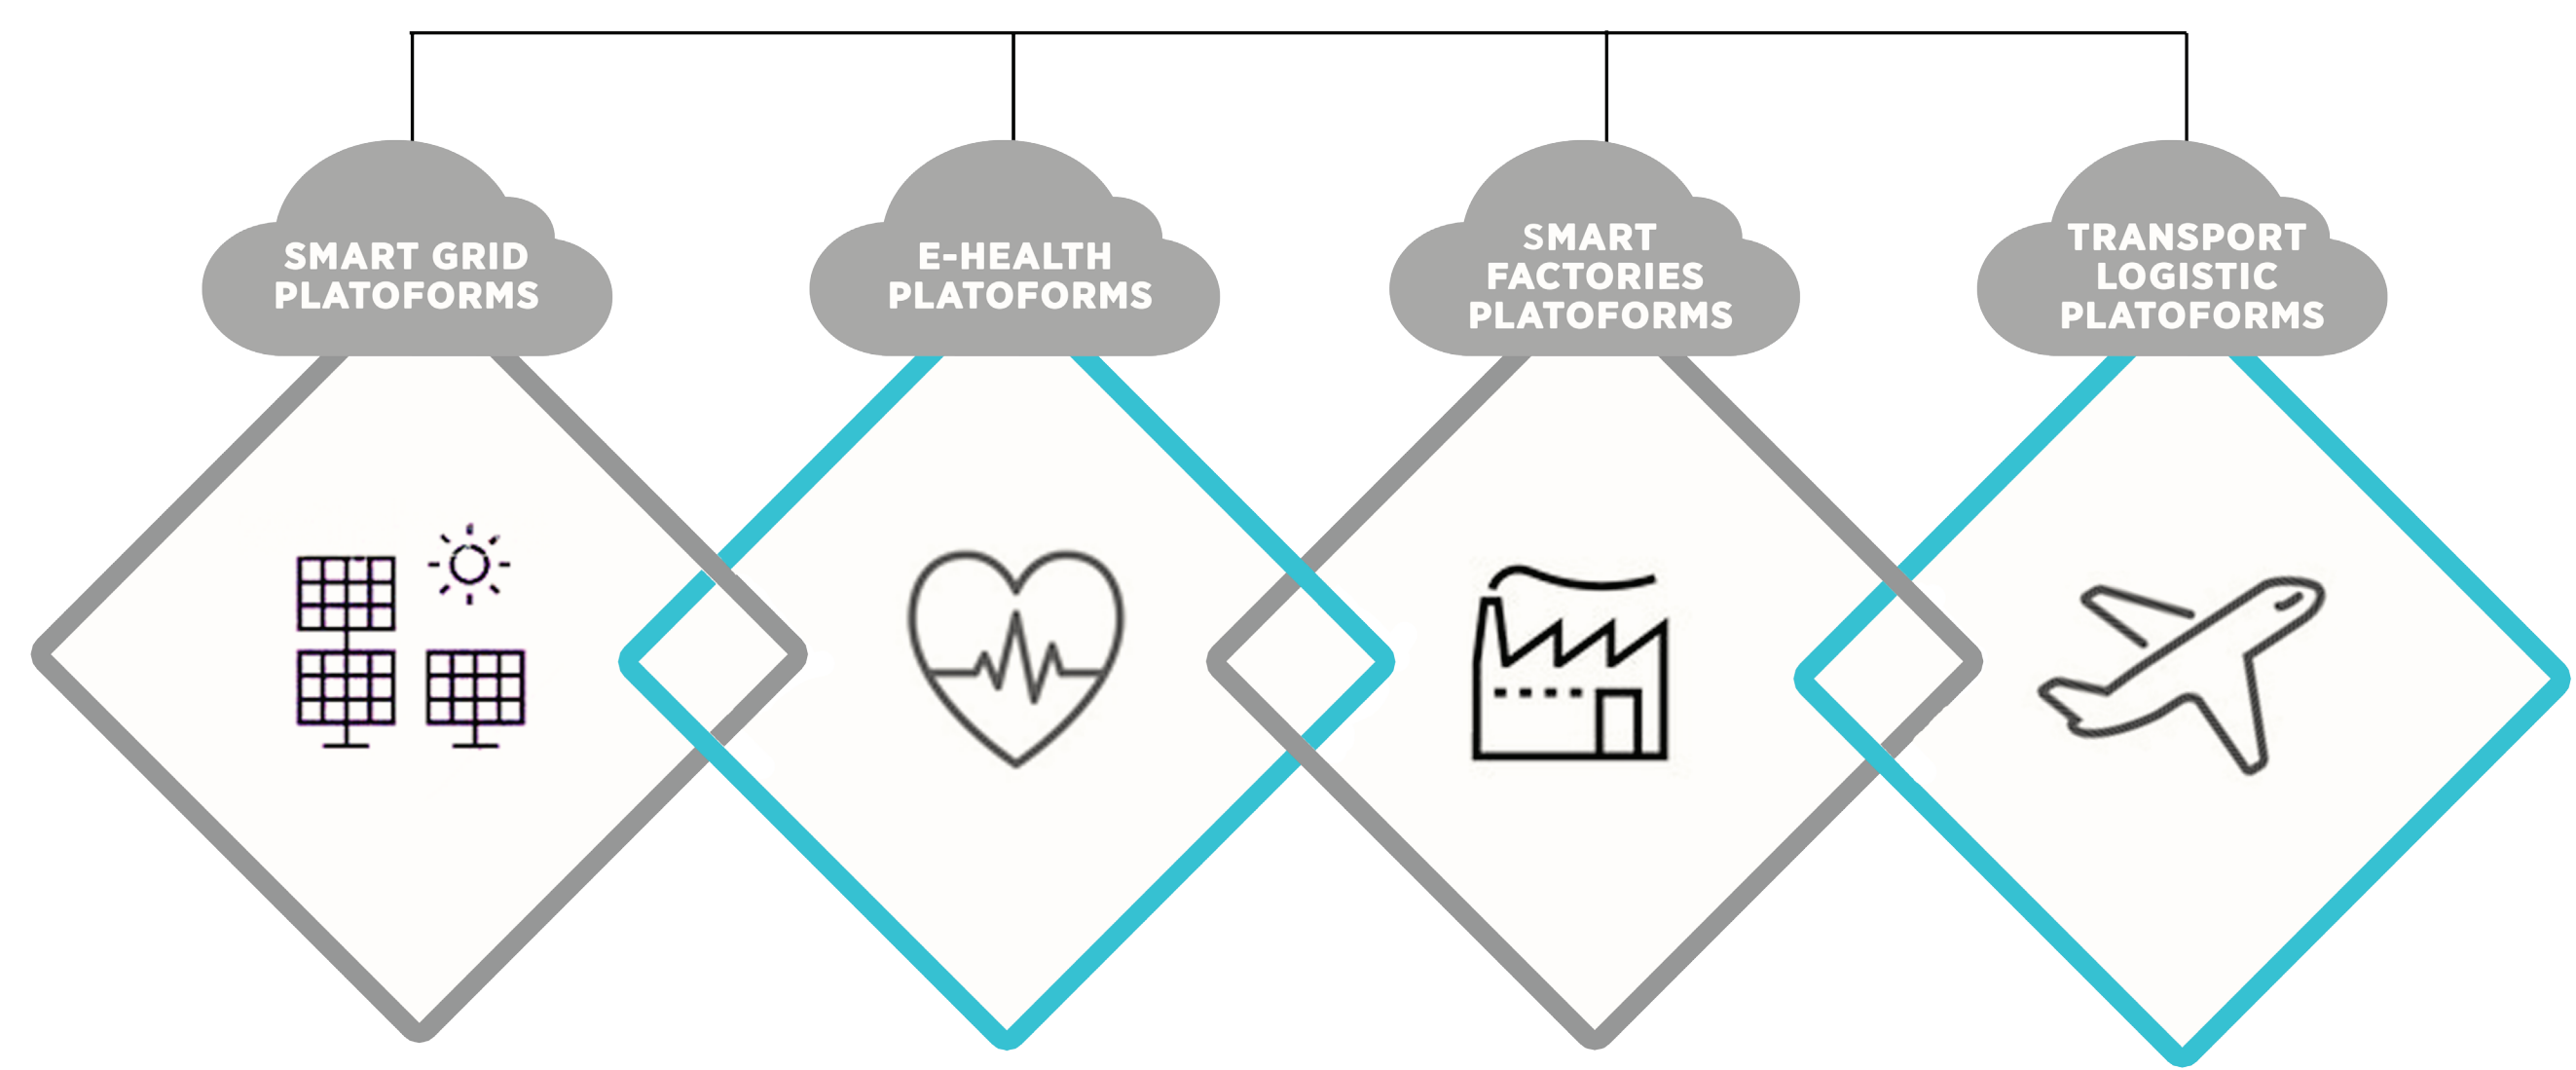

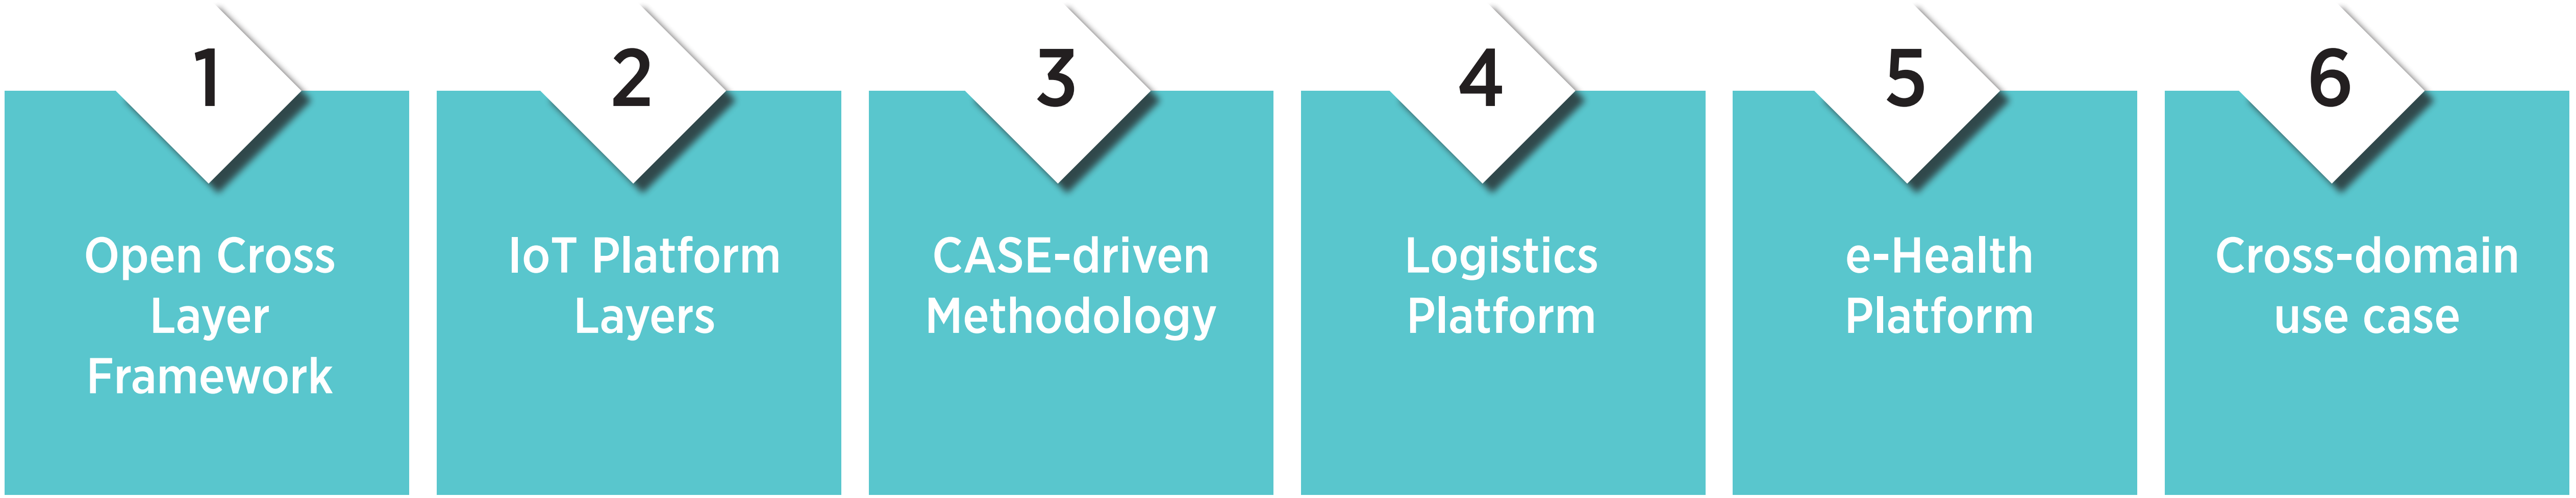

The overall goal of the INTER-IoT project is to provide an interoperable and open IoT framework, with associated engineering tools and methodology, for seamless integration of heterogeneous IoT platforms, regardless of the application domains.
INTER-IoT uses a layer- oriented approach.

OBJECTIVES

1	2	3	4	5	6
Open Cross Layer Framework	IoT Platform Layers	CASE-driven Methodology	Logistics Platform	e-Health Platform	Cross-domain use case
